ONE WORLD GOVERNMENT

TUN M UNFOLD THE NEW WORLD ORDER

Tun Mahathir Mohamad has called for a New World Order which opts for negotiation and arbitration to resolve conflicts between nations.

Tun Dr Mahathir Mohamad speaks at the International Conference on 'New World Order' organised by the Perdana Global Peace Foundation at the Putrajaya International Convention Centre, March 9 2015

TUN M SPEECH ABOUT NEW WORLD ORDER - 2015

“...the idea of NWO is not new, its very old”

“Basically, it's about having a world government, we should **abolished all states, all nations, all borders**, but instead have a fully one world government”

“That one world government is led by **certain people, elites. People who are very rich, very intelligent, very powerful in many ways. They are the one who will govern the world**”

“At that time when NWO was enunciated the population of this world was only 3 billion. **The intention was to reduce it to 1 billion.**”

“**Now the people of the world is 7 billion, there'll be a need to kill many billion of people, to starve them to death or to prevent them to give birth in order to reduce the population of this world**”

No other mechanism will have as much control over the life of a person than a digital currency that will create a system of transactional credits and debits, perhaps also influenced by your **social credit score.**”

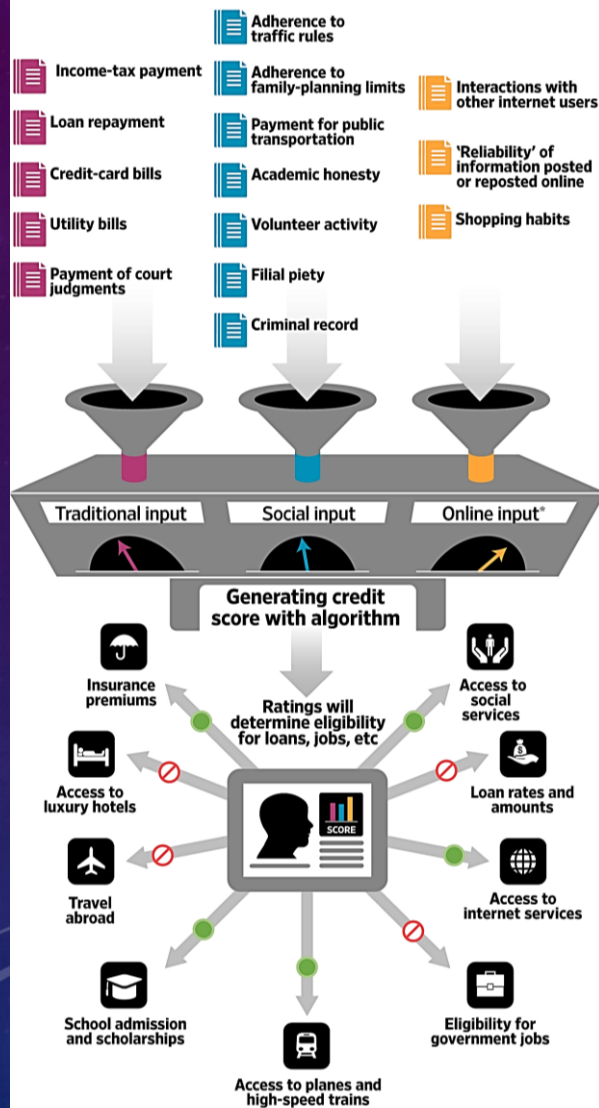

The digital currency requires a digital identity in order for apportionment based on your value to society.

The Chinese social credit score is a variant of that same concept

CHINA SOCIAL CREDIT SYSTEM

China Watching

Beijing wants to create a nationwide 'social-credit' system that compiles digital records of citizens' social and financial behavior to calculate a personal rating that will determine what services they are entitled to — and what blacklists they go on. Here's a look at how the system might work.

China's 'social credit' system ranks citizens and punishes them with throttled internet speeds and flight bans if the Communist Party deems them untrustworthy

GLOBAL ISSUE
LGBTI Inclusion
Curation: OutRight Action International

Lesbian, gay, bisexual, transgender and intersex (LGBTI) issues are fundamentally human rights issues. Sexual orientation, gender identity (a felt and experienced sense of one's gender), gender expression (through actions and appearance), and **sex characteristics are integral to everyone's dignity and humanity - and should not become the basis for discrimination or abuse.** However, many LGBTI people regularly face mistreatment and persecution.

This briefing is based on the views of a wide range of experts from the World Economic Forum's Expert Network and is curated in partnership with Maria Sjodin, Acting Executive Director of OutRight Action International.

Having a trusted, verifiable identity is essential. As digital interaction increases at unprecedented rate, not least due to the COVID-19 crisis, the information comprising our identities is being widely shared in ways that create both opportunities and risks. If designed right, digital identities can provide countries with economic value equal to as much as 13% of their GDP, save hundreds of billions of hours through streamlined e-government, and cut trillions of dollars in costs for businesses by 2030, according to one estimate. For the roughly one billion people going without official proof of identity (and the more than three billion people unable to effectively use an identity on digital channels), collaborative and user-centric digital identity models guided by shared principles can be empowering.

Michele Bachmann tells Steve Bannon about the upcoming vote in Geneva over the Biden administration's amendments that would cede US sovereignty to the WHO over national healthcare decisions.

The Biden Administration is pushing an amendment that will propose all nations on earth cede their sovereignty of health care decisions to WHO.

It means WHO has decision-making authority to intervene into US government policy and any nation of the world without our permission.

The coincidence of lockdown in with 26 million people today lockdown in Shanghai China, they can't leave the apartment/home. WHO would have the authority to be able to enforce here in United State on whatever pretext they want. They don't have to show data, they can do this.

The bottom line its create a platform of global government through WHO.

This is a biggest power grab that we have our seen in our life time.
